

Sinnemahoning State Park

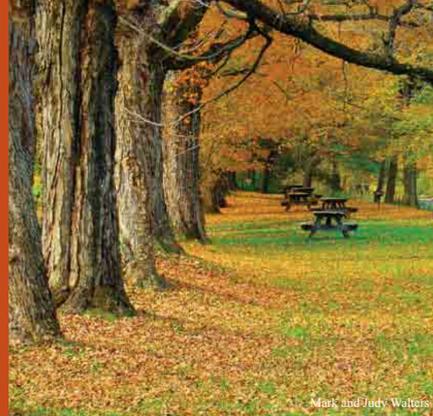

Pennsylvania State Parks Mission

The primary purpose of Pennsylvania state parks is to provide opportunities for enjoying healthful outdoor recreation and serve as outdoor classrooms for environmental education. In meeting these purposes, the conservation of the natural, scenic, aesthetic and historical values of parks should be given first consideration. Stewardship responsibilities should be carried out in a way that protects the natural outdoor experience for the enjoyment of current and future generations.

EXPLORE PENNSYLVANIA WILDS

Pennsylvania Wilds is two million acres of public lands for hiking, biking, fishing, boating, hunting and exploration in northcentral Pennsylvania. Within the twelve-county region are: 29 state parks, including Sinnemahoning; eight state forest districts (1.3 million acres); 50 state game lands and Allegheny National Forest (500,000 acres).

Highlights of the area are: elk watching, scenic PA 6, Pine Creek Gorge (PA Grand Canyon), the darkest skies in the east at Cherry Springs State Park, and hundreds of miles of trails, bike paths and trout fishing streams. For the more adventurous, whitewater rafting through Pine Creek Gorge and hang-gliding at Hyner View State Park offer exciting challenges.

SINNEMAHONING STATE PARK

Mark and Judy Walters

Directions

Sinnemahoning State Park is located on PA 872 in Cameron and Potter counties in northcentral Pennsylvania. The park is 13 miles north of the intersection of PA 120 and PA 872 (outside of the village of Sinnemahoning) or 15 miles south of Austin. The park office, located within the Wildlife Center, is 0.5 mile south of the northern intersection of PA 872 and Park Road. The northern entrance of the park is about 3 miles north on PA 872. For GPS devices use the following coordinates: GPS: Lat. 41.47341 Long. -78.05653

Reservations

Make online reservations at: www.visitPAparks.com or call toll-free 888-PA-PARKS (888-727-2757), 7 a.m. to 5 p.m., Monday to Saturday, for state park information and reservations.

Sinnemahoning State Park, located near the center of the Pennsylvania Wilds' scenic steep valleys region, encompasses 1,910 acres of beautiful scenery and outstanding wildlife habitat. Situated in Cameron and Potter counties, the park is nestled between the green-shouldered ridges of Pennsylvania's Elk and Susquehannock State Forests. The park is long and narrow and includes lands on both sides of First Fork Sinnemahoning Creek, a major

tributary to the Sinnemahoning Creek. At the southern end of the park, a 145-acre reservoir created by the George B. Stevenson dam provides excellent fishing and water recreation opportunities. The abundance of wildlife within the park provides visitors with opportunities to view bald eagles, coyotes, elk and bobcats. In addition, the park's geographic location is excellent for visitors to explore the other treasures of the PA Wilds region.

WILDLIFE CENTER AT SINNEMAHONING

Curt Weinhold

The Wildlife Center at Sinnemahoning State Park opened in 2011. This LEED-certified green building provides office space for park administration and an area for park interpretive programs and environmental education classes. It also provides information to help orient visitors and offers a centrally-located starting point for exploration of the Pennsylvania Wilds. The center also includes a gallery for interactive interpretive exhibits that highlight the history and ecology of the First Fork Valley and a small retail area that features the work of local artisans and offers other outdoor-oriented American-made products. Call the park for current hours of operation. GPS: Lat. 41.47341 Long. -78.05653

NATURAL RESOURCES

From a birds-eye view, Sinnemahoning State Park sits in a deep narrow valley carved out of a high plateau. Melt waters of glaciers massively eroded layers of sandstone and shale and created the deep valleys of this area. For a spectacular view, climb to the top of Brooks Run Road and go right onto Ridge Road to the Logue Run Vista. Notice the uniform, flat-topped hills that rise 2,300 feet above mean sea level. The deep valleys contrast with the heavily forested terrain of the mountains. The farm fields and riparian habitats of Sinnemahoning State Park are part of a rich tapestry that support a variety of plants and animals.

America to raise their young in the seclusion of the park. Common migrants include scarlet tanagers, ovenbirds, northern parula (look for them at the 40 Maples Picnic Area) and the black-billed cuckoo, one of the few birds that may even be heard singing at night.

Summer is a time of growth. Lush vegetation provides the needed nutrients for elk and deer to nourish their young. Look for spotted elk calves and fawns along the Lowlands Trail and a variety of butterflies along the trails and near the Wildlife Viewing Platform. At the northern end of the park, scan the sandy banks of the First Fork for holes indicating the presence of nesting belted kingfishers, a fish-eating bird.

This is a time of growth for invasive species as well. These species, such as mile-a-minute vine, threaten native species and biodiversity when uncontrolled. Park staff and volunteers are involved in efforts in the

northern end of the park to control invasive species. Visitors may see areas of browned vegetation as a result.

In the fall, foliage reaches its peak as the reds, oranges and yellows are revealed in the leaves of the deciduous forests. Watch for the annual migration of bald eagles as they rest and feed on the lake before trekking to their winter grounds. A resident, nesting pair can be seen year-round at the boat launch area. Watch for small congregations of monarch butterflies in October as they prepare for their long migration to South America.

Winter is a good time to search for signs of wildlife. Look for strips of bark removed from trees indicating the presence of elk or tracks of coyote and bobcat in the snow. Resident bald eagles can be seen nest-building and preparing for the upcoming nesting season.

HISTORY

Thomas Taber-III collection

The original inhabitants called this area Sinnemahoning, derived from the American Indians word "Achsinnimahoni" meaning "stony lick." The first Europeans to enter the valleys of the First Fork were most likely fur trappers followed by the first few permanent settlers who scratched out a meager living farming the available bottomlands.

The 1800s saw the beginnings of a logging boom in northcentral Pennsylvania; an industry that targeted the abundant old growth pine and hemlock forests. Boom towns sprang up and quickly grew into major centers for commerce and entertainment.

By the turn of the century, most of the timber had been harvested and huge expanses of once-forested hillsides stood bare and subject to erosion and wildfires. The Department of Forests and Waters (now the Department of Conservation and Natural Resources) purchased this denuded land for state forest lands. The 1850s ushered in the railroad era for the Sinnemahoning Valley. The Lowlands Trail, which runs the length of the park, was built upon the rail bed of the Goodyear Brothers Railroad, constructed around the turn of the 20th century as part of the Sinnemahoning Valley Railroad System.

HISTORY OF THE PARK

Sinnemahoning State Park was developed as a recreational facility after the completion of the George B. Stevenson Dam and the formation of the reservoir.

Originally known as First Fork Dam, the George B. Stevenson Dam was constructed in 1953-55 as part of a comprehensive

four-dam initiative to control flooding on the West Branch Susquehanna River. The dam was re-named in honor of George B. Stevenson, a Clinton County Senator who promoted the legislation authorizing the project. In 1983, the administration of the dam under normal water conditions was

SPECIAL EVENTS

For more information on special events, contact the park office.

Haunted Halloween Trail and All Hallows Eve Celebration invites visitors to Sinnemahoning State Park for a BOO-tiful evening! Visitors can watch for ghosts, ghouls and goblins, and some scary native critters along the Lowlands Trail. Children can enjoy Halloween crafts and games in the Wildlife Center classroom while learning about the origins of Halloween and the animals that are traditionally associated with this holiday.

The **Birds n' Brunch Pontoon Boat Tour** is a special, morning, bird-watching, pontoon

boat excursion offered several times each season. The tour includes a light brunch on the boat, complete with tablecloths and music while anchored in a secluded cove of the lake. Afterward, the boat moves along the shores and wetland areas of the George B. Stevenson dam and offers glimpses of herons, mergansers, kingfishers and other birds that frequent the area. The excursion concludes with a look at the park's resident bald eagles' nest site and hopefully a glimpse of these magnificent birds.

Come Run with the Big Dogs, a sled dog dry-land race, sanctioned by the Canadian-American Sled Dog Association,

It later became part of the Buffalo and Susquehanna Railroad and eventually the Baltimore and Ohio.

The people who settled along the First Fork were a rugged, self-reliant group of individuals, as attested to by the area's most famous resident, Chauncey "Chance" Logue. He was responsible for planting the maples in 40 Maples Day Use Area. Visitors who count the trees will see that Chance actually planted 48 maples. Chauncey's photo and story can be seen on the display panel near the restrooms in the day use area.

In the years following the Great Depression, the Civilian Conservation Corps (CCC) began work in the valley, putting young men back to work. From 1933 to 1936 Lushbaugh Camp, S-139-PA, operated near the present-day site of the Brooks Run Cabin.

transferred to the Bureau of State Parks. During high water events, the dam is regulated in accordance with instructions issued by the Baltimore District, U.S. Army Corps of Engineers.

is held each fall during the first weekend of November. Races include Canine-Cross, Bike-Joring and Cart Races, starting at 9 a.m. each day. Spectator areas are open along the trails and staging area at the 40 Maples Day Use Area. Hot food and refreshments are also available.

Women in the Wilds Weekend is offered each summer as a female-focused weekend filled with opportunities to learn new outdoor skills. Programs include mountain biking, archery, kayaking, outdoor photography, GPS, geocaching, fly-fishing, deer and turkey hunting and many others. Participants may choose up to ten different sessions over the three days of the event.

WILDLIFE WATCHING

Sinnemahoning offers visitors a variety of wildlife watching experiences. Depending upon the season, visitors could encounter nesting bald eagles, elk cows with calves, bears gorging on berries, coyotes yipping in the night or elusive bobcats slipping through the brush.

Bald eagles are a common sight around the lake. Since 2000, a pair of eagles has set up year-round residence in the area. January through March, visitors can observe the pair engaging in bonding rituals and nest-building activity. In March, one to three eggs are laid and incubation begins. Eaglets hatch around the middle of April with fledging occurring usually in the month of June. During the winter months, watch for eagles fishing in the open waters below the dam or eating carrion along the roadside. Throughout the rest of the year, a good pair of binoculars and some patience will provide the casual observer with a spectacular display of eagle behavior.

Sinnemahoning State Park is home to a growing elk herd. Elk are mainly grazers preferring to feed on forbs, legumes and grasses, but will browse on trees and shrubs when adequate ground vegetation is not available. Look for elk near the wildlife viewing platform, 40 Maples Picnic Area and the Wildlife Center at Sinnemahoning. The viewing platform area is managed cooperatively between the Pennsylvania Game Commission and State Parks. The grassy opening near the viewing platform was planted in clover and trefoil, a wildlife favorite. Although elk prefer these open, grassy areas, other wildlife benefit from the food source as well.

Fall is the rut or breeding season for elk. Watch for a herd of cows being guarded by a dominant bull. Listen for the bgle

of day for viewing.

• Consider the weather. After a rain, for instance, many animals emerge to feed.

Let animals be themselves:

- Resist the temptation to 'save' young animals. The mother is usually watching from a safe distance.

- Give nests a wide berth. Your visit may lead predators to the nest.

- Let animals eat their natural foods. Sharing your sandwich may harm the digestive systems of wild animals and get animals hooked on handouts.

Viewing etiquette:

- Leave pets at home
- Observe from a distance

- Film and photograph wildlife responsibly
- If an animal shows stress, move away

- Stay on trails to lessen impact

- Treat others courteously

- Report inappropriate behavior to the authorities

Terry Youakin

ENVIRONMENTAL EDUCATION AND INTERPRETATION

Sinnemahoning State Park offers year-round environmental education and interpretive programs. Through hands-on activities, guided walks and evening programs, participants gain appreciation, understanding and develop a sense of stewardship toward natural and cultural resources.

Curriculum-based environmental education programs are available to schools and other youth groups. Group programs must be arranged in advance and may be scheduled by calling the park office. Teacher workshops on a variety of subjects are also available.

For more information on educational programs and special events, contact the park office at 814-647-8401 or look at the calendar of events at www.visitPAparks.com and click on 'calendar.'

NEARBY ATTRACTIONS

For information on nearby attractions, contact: Potter County Visitors Association, 888-POTTER2. www.pottercounty.org Great Outdoors Visitors Bureau, 814-849-5197. www.visitpago.com

ELK STATE FOREST: The 200,000-acre Elk State Forest provides opportunities for hiking, primitive camping, hunting, fishing and general recreational activities. 814-486-3353.

SUSQUEHANNOCK STATE FOREST: This 262,000-acre forest abuts the northern portion of Sinnemahoning State Park. It provides opportunities for hiking, primitive camping, fishing, boating, hunting and other popular recreational activities. 814-274-3600.

BUCKTAIL STATE PARK NATURAL AREA: This park consists of a beautiful 75-mile scenic drive along PA 120 from Emporium to Lock Haven. This route stretches through a narrow valley which has for years been called the Bucktail Trail. 814-486-3365.

SIZERVILLE STATE PARK: Located six miles north of Emporium on PA 155, Sizerville State Park is nearly surrounded by Elk State Forest and is near the largest block of state forest in the Commonwealth. Sizerville has many interesting recreational and natural opportunities and is a good base to explore the nearby public lands. 814-486-5605.

CHERRY SPRINGS STATE PARK: Named for the large stands of black cherry trees in the park, Cherry Springs boasts some of the darkest night skies

Canoe and kayak programs are very popular from spring to fall. The park has an inventory of kayaks and canoes and offers paddling programs that range from basic to competitive racing.

Wildlife watching pontoon boat tours of the George B. Stevenson reservoir are offered on most Sundays from Memorial Day to Labor Day. In addition, specialty bird watching tours that feature a hot brunch served onboard are scheduled several times each summer, usually on major holiday weekends.

Biking programs are offered on selected Saturdays from May to October. The park has ten hybrid bikes in various adult sizes for use during the program or you may bring your own. Helmets are provided and must be worn.

Wildlife watching programs and opportunities are available year-round. Participants may search for amphibians in the spring, watch bald eagles snatch a fish from the lake or observe black bear gorging on fall berries. Elk can often be seen grazing in open areas near 40 Maples Day Use Area. Keep Wildlife Wild – feeding wildlife is dangerous and illegal. Please don't feed wild animals.

Outdoor photography workshops are offered several times each year. The workshops focus on digital wildlife and landscape photography and are designed for the novice photographer. More advanced workshops will be available in the future. Contact the park office for dates, times, and applicable fees.

John R. Plate

in the northeastern United States. The park provides an astronomy field, special facilities and education programs for astronomers and the general public. 814-435-5010.

ELK SCENIC DRIVE: The drive outlines a 127-mile corridor passing through Clinton, Clearfield, Cameron and Elk counties. The scenic drive takes travelers through the Pennsylvania elk range and offers views of some of the most beautiful areas of the Pennsylvania Wilds. Visitors are provided with abundant opportunities for wildlife viewing and photography. 800-577-2029. www.PAWilds.com

QUEHANNA WILD AREA: The Quehanna Wild Area is a 48,000-acre almost circular patch of small second-growth mixed hardwood forest situated on a plateau in the most unpopulated area of the entire state. The Quehanna Wild Area was set aside to maintain the undeveloped character of the forest environment and is now designated as an Important Bird Area. This area was originally state forest land that was transferred to the Curtis Wright Corporation for jet engine and nuclear research in 1955

and returned to the Commonwealth in 1966. More information on the Quehanna Wild Area can be found through Elk State Forest. 814-486-3353.

PA WILDS ARTISAN TRAIL: The Artisan Trail is a series of shops and locations throughout the PA Wilds that feature work by local artists and artisans. The Artisan Center in Emporium, the park office at Parker Dam State Park and the Wildlife Center at Sinnemahoning State Park are all featured in the Artisan Trail. www.visitPA.com

AUSTIN DAM MEMORIAL SITE: The ruins of a broken dam and destroyed buildings are still visible just north of Austin, approximately 18 miles north of Sinnemahoning State Park on PA 872. On September 30, 1911, the Bayless Pulp and Paper Company Dam on Freeman Run gave way, releasing millions of gallons of water through the town of Austin, killing 78 people and destroying the towns of Austin and Costello. The disaster was reported as far away as San Francisco and inspired the 1913 legislation to control dam construction in Pennsylvania. www.austindam.net

Protect and Preserve our Parks

Please make your visit safe and enjoyable. Obey all posted rules and regulations and respect fellow visitors and the resources of the park.

- Be prepared and bring the proper equipment. Natural areas may possess hazards. You are responsible for you and your family's safety.

- Alcoholic beverages are prohibited.
- Please camp only in designated areas and try to minimize your impact on the campsite.

- Firewood Advisory: Firewood may contain non-native insects and plant diseases. Bringing firewood into the park from other areas may accidentally spread pest insects and diseases that threaten park resources and the health of our forests. Campers should use local firewood. Do not take wood home and do not leave firewood. Burn It!
- Because uncontrolled pets may chase wildlife or frighten visitors, pets must be controlled and attended at all times and on a leash, caged or crated.

- Do your part to keep wildlife wild! Enjoy wildlife from a safe distance and do not feed or approach wild animals.

- Prevent forest fires by having a fire in proper facilities and properly disposing of hot coals. Do not leave a fire unattended.

- Please park only in designated areas and obey all traffic regulations.

- Please recycle. Place trash accumulated during your stay in proper receptacles, or take it home with you.

RECREATIONAL OPPORTUNITIES

Spend the Day

Mark and Judy Walkers

BOATING: electric motors only
The lake access features a boat launch and mooring area. Forty mooring spaces near the boat launch area are available for rental from April to October and five courtesy spaces are held in reserve for overnight guests. A mooring permit is required and may be obtained at the Wildlife Center at Sinnemahoning.

Motorboats must display a boat registration from any state. Non-powered boats must display one of the following: boat registration from any state; launching permit or mooring permit from Pennsylvania State Parks that are available at most state park offices; or launch use permit from the Pennsylvania Fish and Boat Commission.

FISHING: The 145-acre George B. Stevenson Reservoir has fishing for cold-water and warm-water species, including brook, rainbow and brown

trout, smallmouth and largemouth bass, sunfish, bluegill, pickerel, perch, crappie and catfish. An ADA accessible fishing pier is located near the boat launch. Nearby creeks also provide good angling and some feeder streams in the park contain native brook trout. Excellent fly fishing can be found on First Fork Sinnemahoning Creek, downstream from the mouth of Bailey Run for 2.1 miles. This section is designated as a delayed harvest, artificial lures only special regulation area. All Pennsylvania Fish and Boat Commission rules and regulations apply.

HABITAT IMPROVEMENT: For several years, Sinnemahoning State Park has partnered with the Pennsylvania Fish and Boat Commission's Cooperative Habitat Improvement Program (CHIP) to place fish and turtle habitat structures in the lake and ponds throughout the park. This program places habitat structures, primarily made of

wood or rocks, in lakes or impoundments in the Commonwealth. The habitat structures mimic the aquatic environment in a natural lake and aid in the survival and reproduction of aquatic species. For additional information visit www.fishandboat.com.

PICNICKING: The park contains two main picnic areas. The Eagle Watch Picnic Ground at the George B. Stevenson reservoir is located in an open grassy area, and includes picnic tables and charcoal grills. In addition, a pavilion with an adjoining checkers/chess table and grill is located at the boat launch.

The 40 Maples Day Use Area includes two ADA accessible pavilions, along with numerous individual picnic tables scattered throughout the area. It also contains a volleyball net, horseshoe pits and a basketball half-court. Electricity is not available in this area.

Pavilions can be reserved up to 11 months in advance and must be reserved at least two days in advance. Unreserved pavilions are free on a first-come, first-served basis.

HIKING: The Lowlands Trail follows the course of the First Fork through five miles of the park, passing through open fields, shrubby riparian zones and mature, towering forests. This scenic trail was originally part of the Baltimore and Ohio railroad bed. Interpretive panels along the way provide insights into the wildlife and ecology of the park.

An ADA accessible wildlife viewing platform is located at the northern trailhead of the Lowlands Trail. This area is ideal habitat for deer, elk, woodcock, migratory songbirds and monarch butterflies. The trail from the wildlife viewing platform to the 40 Maples Day Use Area is ADA accessible.

A spur of the trail near the 40 Maples Day Use Area leads to a secluded viewing

Stay the Night

CAMPING: The 35-site campground is situated one mile south of the Wildlife Center along PA 872 and is open from the second weekend of April to mid-December. The camping area features a sanitary dump station and a modern restroom with flush toilets and showers. The restroom and some campsites are ADA accessible.

Electric hook-ups are available at most sites, which are sized to accommodate camping equipment from tents to large recreational vehicles and motor homes. All are equipped with picnic tables, lantern hooks and campfire rings. Pets are permitted on designated sites. Campsites can be

reserved up to 11 months in advance and up to noon on the day of arrival. Interpretive programs are offered throughout the summer season at the centrally-located campground amphitheater.

BROOKS RUN CABIN: Brooks Run Cabin is nestled in a hemlock grove along Brooks Run stream at the southern end of the park. The four-bedroom modern cabin has accommodations for twelve people and includes an updated, fully-outfitted kitchen and a living room with a stone fireplace. Linens, washcloths, towels, cleaning supplies and food are not supplied. A secluded patio and campfire area provides convenient space

for outdoor cooking and entertaining. This popular cabin can be reserved up to 11 months in advance and must be reserved at least two days in advance. It is available by the week during the summer season and for a minimum of two days for off-season reservations.

HUNTING AND FIREARMS: About 1400 acres of the park are open to hunting, trapping and the training of dogs during the established seasons. Common game species are deer, grouse, squirrel, bear, turkey and waterfowl.

Hunting woodchucks, also known as groundhogs, is prohibited. Dog training is only permitted from the day following Labor Day through March 31 in designated hunting areas. The Department of Conservation and Natural Resources and the Pennsylvania Game Commission rules and regulations apply. Contact the park office for ADA accessible hunting information.

Use extreme caution with firearms at all times. Other visitors use the park during hunting seasons. Firearms and archery equipment used for hunting may be uncased and ready for use only in authorized hunting areas during hunting seasons. In areas not open to hunting or during non-hunting seasons, firearms and archery equipment shall be kept in the owner's car, trailer or leased campsite. The only exception is that law enforcement officers and individuals with a valid *Pennsylvania License to Carry Firearms* may carry said firearm concealed on their person while they are within the park.

Enjoy the Winter

SNOWMOBILING: The park trail consists of 1.1 miles of joint-use road and 4.1 miles of trail for a total of 5.2 miles. The trail is clearly delineated by signs and orange blaze markers. Current snow depths and conditions are posted on the state park website.

The park trail joins the trails of the Elk State Forest at Brooks Run Road, making 25 total miles of trail system. All state forest trails are groomed weekly. Snowmobiles may be operated on designated trails and roads from the day following the last deer season in December until April 1, weather permitting. Snowmobiles are prohibited from operating on frozen water surfaces and shorelines. All snowmobiles must be registered.

ICE SKATING: Conditions permitting, an ice skating area is available on the pond at the Wildlife Viewing Area near the northern end of the park. Please use caution.

Ice thickness is not monitored. For your safety, be sure the ice is four inches thick and carry safety equipment.

ICE FISHING: Conditions permitting, all areas of the lake are open for ice fishing except within 50 feet of the trash boom by the dam. Check the park website for current ice depths. **Ice thickness is not monitored.** For your safety, be sure the ice is four inches thick and carry safety equipment. Extreme caution must be taken during ice related activities. Dangerous ice conditions like unsafe or weak ice or air pockets may exist due to rapidly rising or falling lake levels.

STATISTICS OF GEORGE B. STEVENSON DAM

- Rolled, earth-fill structure 1,918 feet long and 166 feet high
- Top width of 30 feet and a maximum width of 940 feet at the base
- A 16-foot diameter reinforced concrete tunnel carries the flow of the creek through the right (west) abutment of the dam
- The 211-foot high reinforced concrete control tower houses the two, 37-ton sluice gates and operating equipment
- The flood control storage of the reservoir is equal to 5.85 inches of runoff from the 243-square mile drainage area above the dam
