STRUCTURE ON BASE OF DUNKIRK RADIOACTIVE SHALE FACIES

Contour interval = 500 feet

-500 Structure contour on the base of the Dunkirk radioactive shale facies

M / D Generalized boundary of Mississippian (M) - Devonian (D) outcrop (for detail, see Geologic Map of Pennsylvania, 1960)

o⁵ Well identification number (see Penn. Geol. Survey Open File Rept. 1, 1970) for wells penetrating the Tully Limestone or deeper

o³ Well identification number (see Penn. Geol. Survey Open File Rept. 1, 1970) for wells ending before penetration of the Tully Limestone

-1234 Well showing depth below sea level of base of Dunkirk radioactive shale facies

+204 Well showing height above sea level of base of Dunkirk radioactive shale facies

Limit of the Dunkirk radioactive shale facies
